Closest prior art

Document US-6186577 discloses a rear boot lid unit for a vehicle with a folding roof, according to the features of lines 1 to 26 and 30 to 32 of claim 1, and a vehicle provided with such a boot lid, according to independent claim 13.

The boot lid described in said document can be opened from the front rearwards and from the rear forwards. The mechanism has the disadvantages of being complex and occupying a relatively large space and consequently cannot be applied to a wide variety of vehicles.

Aim (problem to be solved)

To simplify the mechanism.

Solution

The control means include a hinged arm, which is mobile during the first movement (opening from the front rearwards) and during the second movement (opening from the rear forwards).

US-6186577 only discloses that the hinged arm is mobile during the first movement (opening from the front rearwards).
